Projects

- **Treasures (A Child Health Care App)** : I served as the Development Team Lead, overseeing task delegation and providing strategic plans to guide the development of the Treasures website. I worked closely with the front-end team to execute the website design and integrate it into the development process. I maintained constant communication with cross-functional teams including the UI/UX team and product managers to exchange feedback and updates on the site's progress.
- **Hostel Management System** : Built a system to that lets the hostel supervisor manage room allocations and selection, see vacant rooms, payments etc. all in on one platform.
